Aim:

6. Modify the RAM and Storage for the Created Virtual Machine.

Procedure :-
→ open Created Virtual Machine, which was done already.
→ Make Sure your Virtual machine is shut down and not running.
→ Open oracle VM Virtual Box, and select the Virtual machine you want to modify from the list of Virtual machines.
→ Click on the "Settings" button in the top menu.
→ In the "Settings" Window, click on the "Systems" tab on the left-hand side.
→ Under the "Motherboard" tab, you can modify the amount of RAM to 10GB that is allocated to your Virtual machine by Sliding the "Base Memory" Slider or entering the value 25GB manually in the text box.
→ To modify the Virtual hard disk, click on the "storage" tab on the left-hand side of the "Settings" Window.
→ Select the Virtual hard disk you want to modify from the list of storage devices, and click on the "Attributes" button.

→ In the 'Attributes' Window, You can modify the size of the Virtual hard disk by sliding the "Size" slider or entering the value manually in the text box.

→ After making your desired changes, click "OK" to save your modifications. That's it! Your changes to the RAM and storage for your Virtual machine should now be reflected the next time you start the Virtual Machine.

Output:

□ Sannapaneni Pavani;

✓ Devices

Memory : 9.2 GB

Processors : 2

Hard Disk (SCSI) : 4 GB.

Network Adaptor : NAT

Sound Card : Auto detect

Display : Auto detect

Memory : 9.2 GB.
Processors : 2
